

1 APPARATUS FOR SELECTIVELY DISTRIBUTING DOCUMENT
2 PRODUCTION JOB OUTPUT
3

4 Abstract of the Invention

5 A document production apparatus has a job output distribution control
6 module for creating subsets of job output within a single executed document
7 production job. The subsets may be created to contain numbers of documents
8 as specified by a user. Additionally, the distribution control module directs the
9 thus created subsets to deposit in desired output receptacles. Preferred
10 embodiments of the document production apparatus comprise copiers and
11 printers.
